

POWER UP LUBRICANTS

GUNMATE

SPECIFICALLY DESIGNED FOR USE IN MILITARY, AGENCY AND RECREATIONAL FIREARMS

EXCELLENT FRICTION REDUCTION

- Reduces friction in boundary lubrication where metal-to-metal contact occurs, specifically bullet and bore interface.
 - Reduces barrel wear and temperature as a result of reduced friction.
 - Reduces temperature allowing extended firing sequences without stoppage.
- Reduces wear and subsequent deposition of metallic particles, which are the main causes of jamming.
- Improves cleaning ability to reduce the negative effects of carbon deposits.
 - Improves lubrication which reduces the incidence of the jamming of mechanisms.
 - Extends the useful life of firearms.

EXCELLENT CORROSION PROTECTION

- Gunmate LV is specifically formulated with anti-corrosion and fingerprint removal properties

DIRECTIONS

- Shake Well before using

Typical Properties:

Appearance	Cloudy
Colour	3.5
Density @20°C	0.8710kg/L
Viscosity @40°C	13.5cSt
